Career Objective

Data Science student with a minor in Environmental Science, experienced in AI, sustainability, GIS, dashboards, and predictive analytics projects. Passionate about solving real-world environmental and urban challenges using data-driven technologies, machine learning, and visualization tools.

Technical Skills

- **Programming:** Python, R, Java, SQL
- **AI & Data Science:** Machine Learning, Data Visualization, Predictive Analytics, RAG, LLM Basics
- **Tools & Platforms:** Tableau, VS Code, GitHub, Microsoft Office Suite, PowerBI
- **Web & Cloud:** HTML, Cloud Computing Fundamentals
- **Environmental & GIS:** Remote Sensing, GIS Basics, NDVI Analysis, Sustainability Concepts

Projects

Earthquake Prediction and Disaster Analysis System

- Built a predictive analytics project using earthquake datasets and visualization techniques.
- Analyzed seismic activity trends and disaster-related environmental impacts.
- Created interactive data insights for risk assessment and awareness.

Crime Data Analysis and Prediction System

- Performed crime trend analysis using data science and visualization methods.
- Applied predictive concepts to identify high-risk regions and patterns.
- Developed dashboards and analytical reports for data interpretation.

Bhoomi Chatbot – Farming Assistant (GenAI Project)

- Developed an AI-powered farming assistant using **RAG (Retrieval-Augmented Generation)** architecture.
- Integrated external agricultural knowledge sources with LLM methods.
- Provided crop, weather, and environmental guidance support for farmers.

Live Weather Data for Farming Recommendation

- Built an interactive Tableau dashboard using weather datasets for farming recommendations.
- Supported crop planning and environmental decision-making using data visualization.

AI Nutritionist App

- Developed an AI-based nutrition recommendation application using LLM concepts.
- Generated personalized diet suggestions based on user inputs and health goals.

Experience

EHS Intern – Biocon Limited, Bangalore

June 2025 – July 2025

- Worked in the **Environment, Health, and Safety (EHS)** department.
- Assisted in safety audits, compliance activities, documentation, and workplace safety monitoring.
- Gained practical exposure to environmental compliance and industrial safety standards.

Intern – Diya Foundation, Bangalore

April 2022 – June 2022

- Conducted educational workshops and community engagement activities.
- Developed communication, leadership, and teamwork skills.

Karate Instructor & Self-Defense Trainer

- Earned 1st Dan Black Belt in Karate.
- Conducted self-defense training sessions for students and volunteers.
- Assisted in organizing workshops, demonstrations, and tournaments.

Education

Bachelor of Computer Applications (BCA) – Data Science

Chanakya University, Devanahalli

MAY 2026

CGPA: 7.95 / 10

Minor: Environmental Science

Pre-University Course (PCMB)

CMR PU College, ITPL

March 2023

Percentage: 85%

10th IGCSE

NBIRS, Mandur

March 2021

Percentage: 89%

Certifications

- Environmental Science – NPTEL (2024)
- Environmental Engineering – NPTEL (2024)
- Basics of R Programming
- Workshop on Tableau
- Introduction to Environmental Engineering & Science (2025)
- Winter Internship Technical Training Program – India Space Lab (2026)- Training exposure to Remote Sensing, GIS, Drone Technology, CanSat, CubeSat, Rocketry Science, and Disaster Management
- Environmental Geosciences - NPTEL (2026)
- Master Microsoft Power BI (2026)

- Data Visualization: Empowering Business with Effective Insights -TATA Group (Forage) (2026)
- Monitoring Air Pollution Effects under the Convention - UNECE, (2026)
- Introduction to Greenhouse Gas Accounting for IT - Cisco Networking Academy, (2026)

Leadership & Activities

- NSS Volunteer – Participated in community outreach and sustainability initiatives.
- Participated in a 7-day National Integration Camp (NIC) focused on leadership and teamwork.
- Active participant in environmental and smart-city related academic projects.
